Summary

Buraya benim ozetim gelecek

Education

Northeastern University

M.Sc. in Data Science. GPA: 3.95

Jan. 2023 – June 2025 (Expected)

Boston, MA

Istanbul Technical University

B.Sc. in Industrial Engineering. High Honor List. GPA: 3.72

Sep. 2016 – June 2021

Istanbul, Turkey

Experience

Funcrredible

Sep. 2024 – Dec. 2024

Data Analyst

Austin, TX

- Analyzed 50+ potential product ideas and provided data-driven recommendations, leading to the successful launch of 3 high-performing products with projected monthly revenues exceeding \$50,000.
- Conducted keyword research and optimized product listings with Helium10, driving a 25% increase in organic rankings.

Khoury College of Computer Sciences

Dec. 2023 – June 2024

Graduate Teaching Assistant

Boston, MA

- Conducted weekly office hours to provide guidance on class concepts, covering topics such as SQL, Python, Data Modeling, Web Scraping, and tools like MongoDB, Hadoop, and Spark.
- Evaluated student code for accuracy and adherence to requirements and assigned grades for projects and exams.

Turkcell

Dec. 2020 – Jan. 2022

Data Analyst

Istanbul, Turkey

- Designed a real-time dashboard and budget forecast model, streamlining SME and Key Account performance metrics across departments and delivering weekly data reports to McKinsey, improving forecasting accuracy by 25%.
- Automated data extraction processes using SQL and Python, reducing manual effort by 30% across reporting tasks.
- Collaborated with troubleshooting teams to identify and resolve data discrepancies, managing 40 cases per month.

Microsoft

Nov. 2020 – July 2021

IMAGINE Fellow / Student Ambassador

Istanbul, Turkey

- Designed and implemented 5 Azure-based projects leveraging Cognitive Services APIs (Bing, Speech, Decision, OCR, Face/Emotion) to create real-world applications.
- Conducted hands-on workshops on Azure and Machine Learning, training over 100 students on deploying Cognitive Services APIs with Python and Azure SDKs.

Selected Projects

IMDb Movie Review Sentiment Analysis | *Python, Machine Learning, NLTK* 🐙

May 2023

- Conducted sentiment analysis on 50,000 IMDb movie reviews using TF-IDF vectorization, NLTK for text preprocessing and machine learning models, achieving a 90% accuracy rate with a CNN-LSTM hybrid model.
- Analyzed and compared the performance of 11 different machine learning models, demonstrating superior analytical and programming skills in Python and deep learning frameworks.

Relational Database Design and Implementation: Bird Strike Analysis | *R, SQL, MySQL* 🐙

January 2023

- Developed a relational database in MySQL for bird strike incidents, incorporating advanced data manipulation with R.
- Populated the database using a batch processing method, markedly optimizing the speed by 80% over standard methods.
- Implemented SQL stored procedures to streamline bird strike data entry and updates, integrating specific error handling and data validation protocols.

Intraday Electricity Market Price Forecast Using Machine Learning | *Python, Machine Learning* 🐙

June 2021

- Achieved a \$1.5 MAE using a CNN-LSTM hybrid model, outperforming other models including Bi-LSTM and GRU.
- Leveraged Facebook's Prophet for data preprocessing, effectively handling over 50 features to fine-tune model accuracy.

Leadership / Extracurricular

New England Turkish Student Association (NETSA)

Sep, 2023 – Present

Vice President

Boston, MA

- Facilitated events and workshops, strengthening the connection between Turkish and American student communities.
- Increased the organization’s treasury by 45% through strategic grant applications and corporate sponsorships.
- Enhanced the association’s visibility and engagement through social media, increasing event participation by 30%.

Technical Skills

Languages: Python, R, SQL, C++
Technologies: MS Azure, MS Office, AWS, Tableau, Squarespace, Windows, MacOS
